A Primer dimer (PD) is a potential by-product in PCR, a common biotechnological method.As its name implies, a PD consists of primer molecules that have attached to each other because of strings of complementary bases in the primers. As a result, the DNA polymerase amplifies the PD, leading to competition for PCR reagents, thus potentially inhibiting amplification of the DNA sequence targeted ...

Shipping container architecture is a form of architecture using steel intermodal containers (shipping containers) as structural element. It is also referred to as cargotecture, a portmanteau of cargo with architecture, or "arkitainer".. The use of containers as a building material has grown in popularity over the past several years due to their inherent strength, wide availability, and ...
