"It has long been an axiom of mine that the little things are infinitely the most important" (Sherlock Holmes)

Statistics bibliography 3 - stats - Influential Points

The Newman-Keuls or Student-Newman-Keuls (SNK) method is a stepwise multiple comparisons procedure used to identify sample means that are significantly different from each other. It was named after Student (1927), D. Newman, and M. Keuls. This procedure is often used as a post-hoc test whenever a significant difference between three or more sample means has been revealed by an analysis ...

Hello Charles! Thank you for such a useful program and especially for your explanations and examples. I realize what a colossal work this is! But I get some strange results, using Kruskal-Wallis and Dunn's test: in some cases of pairwise differences testing I see p-value > 1 (for ex. 5 or 15).

Follow-up to Kruskal-Wallis | Real Statistics Using Excel

The sign test is a statistical method to test for consistent differences between pairs of observations, such as the weight of subjects before and after treatment. Given pairs of observations (such as weight pre- and post-treatment) for each subject, the sign test determines if one member of the pair (such as pre-treatment) tends to be greater than (or less than) the other member of the pair ...

Abstract. The purpose of this study was to investigate energy system contributions and energy costs in combat situations. The sample consisted of 10 male taekwondo athletes (age: 21 ± 6 years old; height: 176.2 ± 5.3 cm; body mass: 67.2 ± 8.9 kg) who compete at the national or international level.

Energy demands in taekwondo athletes during combat

Echocardiography allows the non-invasive assessment of the dimensions and anatomy of the heart and its functional characteristics 1,2. Because of these aspects this exam has become key to diagnose, assess the repercussions and follow-up on children and adolescents with suspicion of or with cardiopathy 2-6. Many studies have used echocardiography to establish standards of normalcy for cardiac ...

In statistica, quando si stima un parametro, la semplice individuazione di un singolo valore $\hat{\mu}$ spesso non è sufficiente. È opportuno allora accompagnare la stima di un parametro con un intervallo di valori plausibili per quel parametro, che viene definito intervallo di confidenza (o intervallo di fiducia).. Se X è una variabile casuale con distribuzioni di probabilità che dipendono da qualche ...

Microplastics pollution is a global paradigm that raises concern in relation to environmental and human health. This study investigated toxic effects of microplastics and mercury in the European seabass (*Dicentrarchus labrax*), a marine fish widely used as food for humans. A short-term (96 h) laboratory bioassay was done by exposing juvenile fish to microplastics (0.26 and 0.69 mg/L), mercury (0 ...

RESUMEN. Objetivos: Conocer la relación entre el desayuno desde el punto de vista cualitativo y el rendimiento escolar. Material y métodos: El estudio se realizó en 141 alumnos (70 varones y 71 mujeres) con edades comprendidas entre 12 y 13 años, de 1º de Educación Secundaria Obligatoria (ESO) de un Instituto de Zaragoza mediante el recordatorio del desayuno del día anterior.

Estudio sobre el desayuno y el rendimiento escolar en un
