Effective Learning Techniques: Promising © The Author(s)

Educational psychology is the branch of psychology concerned with the scientific study of human learning. The study of learning processes, from both cognitive and behavioral perspectives, allows researchers to understand individual differences in intelligence, cognitive development, affect, motivation, self-regulation, and self-concept, as well as their role in learning.

Educational psychology - Wikipedia

In psychology, cognitivism is a theoretical framework for understanding the mind that gained credence in the 1950s. The movement was a response to behaviorism, which cognitivists said neglected to explain cognition. Cognitive psychology derived its name from the Latin cognoscere, referring to knowing and information, thus cognitive psychology is an information-processing psychology derived in ...

Piaget's (1936) theory of cognitive development explains how a child constructs a mental model of the world. He disagreed with the idea that intelligence was a fixed trait, and regarded cognitive development as a process which occurs due to biological maturation and interaction with the environment.

Negative punishment is an important concept in B. F. Skinner's theory of operant conditioning. In behavioral psychology, the goal of punishment is to decrease a certain unwanted behavior. In the case of negative punishment, it involves taking something good or desirable away to reduce the occurrence of a particular behavior.

"Any given method is only as effective as its implementation." Grammar-Translation Method (1890s-1930s): Around the turn-of-the-century, language students often translated cumbersome volumes from Classical Greek or Latin into English via this approach. It consisted mainly of exhaustive use of dictionaries, explanations of grammatical rules (in English), some sample sentences, and exercise ...

Methodologies in Foreign Language Teaching

There are a number of learning theories, such as classical conditioning and operant conditioning, that emphasize how direct experience, reinforcement, or punishment lead to learning. However, a great deal of learning happens indirectly.
