This time of year is the time to slow down for holidays and plan and get ready for the next year. What a better career boost you can get than ongoing courses sale at Udemy , the online training courses provider.

Adminschoice.com - Magazine for Sysadmins & Technologists

A system administrator, or sysadmin, is a person who is responsible for the upkeep, configuration, and reliable operation of computer systems; especially multi-user computers, such as servers.The system administrator seeks to ensure that the uptime, performance, resources, and security of the computers they manage meet the needs of the users, without exceeding a set budget when doing so.

System administrator - Wikipedia

This guide shows how to work with LVM (Logical Volume Management) on Linux. It also describes how to use LVM together with RAID1 in an extra chapter. As LVM is a rather abstract topic, this article comes with a Debian Etch VMware image that you can download and start, and on that Debian Etch system ...
