Mentoring the Staff Nurse in Evidence Based Practice and

Nursing assessment is the gathering of information about a patient's physiological, psychological, sociological, and spiritual status by a licensed Registered Nurse. Nursing assessment is the first step in the nursing process. A section of the nursing assessment may be delegated to certified nurses aides. Vitals and EKG's may be delegated to certified nurses aides or nursing techs.

Most quantitative studies follow these steps: 1) Select the target population, 2) Select the accessible population, 3) State the eligibility criteria, 4) Outline the sampling plan, and 5) recruit the sample. Most qualitative studies might evolve this way: 1) a general idea of where and with what population to start and by soliciting a few cases through convenience procedures, 2) successive

Team nursing is a system of integrated care that was developed in 1950s (under grant from W.K. Kellogg Foundation) directed by Eleanor Lambertson at Teachers College, Columbia University in New York, NY. Because the functional method received criticism, a new system of nursing was devised to improve

patient satisfaction. "Care through others" became the hallmark of team nursing.

Introduction. Intraoperative nurses are responsible for planning and putting in practice nursing interventions that minimize or make it possible to prevent complications deriving from the anesthetic-surgical procedure, with a view to the patient's safety, comfort and individuality (1).. The patient's surgical positioning is an important procedure in intraoperative nursing care.
