Nervous system research paper introduction - halmak.com.pl

The Nervous System is a complex System that has been broken into two major sections. One is the Central Nervous System also known as the CNS. This system consists of the brain and the Spinal cord. The second system is the Peripheral Nervous System which is known as the PNS. The PNS consist of all the other neural elements.

The Nervous System - Research Paper Example

How the impulse is interpreted is the job of the central nervous system. A blow to the head near the optic center of the brain produces the same results as though the impulse had originated in the eyes. The neurons are the functional units of the nervous system through which coordination and control in organisms is executed.
