neural darwinism theory of pdf

Darwinism is a theory of biological evolution developed by the English naturalist Charles Darwin (1809â€"1882) and others, stating that all species of organisms arise and develop through the natural selection of small, inherited variations that increase the individual's ability to compete, survive, and reproduce.Also called Darwinian theory, it originally included the broad concepts of ...

Darwinism - Wikipedia

Development of the nervous system refers to the processes that generate, shape, and reshape the nervous system of animals, from the earliest stages of embryogenesis to adulthood. The field of neural development draws on both neuroscience and developmental biology to describe and provide insight into the cellular and molecular mechanisms by which complex nervous systems develop, from the ...
