Australian dentistry is overseen by the Australian Dental Council and the Dental Board of Australia. The professional body for dentists is the Australian Dental Association. Dentists trained in Australia must meet the entry requirements of one of the Australian institutions offering dental courses, and then complete the required full-time academic training leading to a dental degree.

A bridge is a fixed dental restoration (a fixed dental prosthesis) used to replace one or more missing teeth by joining an artificial tooth definitively to adjacent teeth or dental implants. A bridge will span the area where teeth are missing. They are attached to the natural teeth or implants that surround this space. The natural teeth or implants which support the bridge are called abutments.
